## Stella Maris College (Autonomous) Postgraduate Department of Bioinformatics

The Department of Bioinformatics, established in 2002, seeks, in addition to teaching a globally relevant curriculum to develop research skills by providing facilities for Bioinformatics computing. We have a State-of-the-Art computational facility to foster interdisciplinary collaborative research in Biological, Chemical and Physical Sciences.

The Department provides an integrated environment for drug design, modeling and simulation solutions for biomolecules, comparative modeling and docking, computational chemistry and genome analysis.

### Software available in the laboratory:

- ✓ Molecular modeling programs-Macromodel from Schrodinger, Inc.
- ✓ Cheminformatics computing environment-Canvas from Schrodinger, Inc.
- ✓ Quantum chemistry programs-Jaguar from Schrodinger, Inc. (DST-FIST grant)
- ✓ MatLab – Bioinformatics Toolbox which provides tools for next-generation sequencing (NGS), microarray analysis, and sequence analysis (DST-FIST grant).

### Career Opportunities

- ✓ Biomedical research
- ✓ Pharma companies
- ✓ Software industries
- ✓ Program analysts

### Eligibility

Any undergraduate degree in Zoology, Botany, Biotechnology, Microbiology, Chemistry, Physics, Mathematics and Computer Science.

Applications will be available through the following link
